LEHMANN PORTFOLIO
2022

Passionate designers, talented master glassmakers and innovative manufacturing techniques to shape unique tasting glasses every day.

LE DESIGN

Slender curves and ideal proportions

Cradle of all our creations, our tasting glasses are imagined with passion and carefully designed in Reims. With the Lehmann brand, we subtly mix glass know-how & oenological expertise.

THE SOUFFLÉ MACHINE

Elegant and durable glasses

This industrial process as well as our mastery of cold cutting bring great durability and resistance to the product while approaching the finesse and transparency of our mouth-blown collections.

THE ULTRALIGHT

The haute couture revolution of tasting glasses

After two years of research & development, the innovative "Ultralight" process is finally available. This manufacturing technique combining exceptional finesse and optimal lightness provides the "wow" effect of our signature mouth-blown and machine-blown collections!

THE CRYSTALLINE

A new generation material

Our recipe for Lead-Free Crystal (Crystalline) is a well-kept secret. This unique formulation, which puts an end to the use of lead, guarantees the brilliance, transparency and exceptional sound of our tasting glasses.

THE SOUFFLÉ BOUCHE

More than 6 master glassmakers for the manufacture of a mouth-blown glass

Art born 2000 years ago, this artisanal and ancestral process requires great rigor, patience and unique know-how. In collaboration with our Master Glassmakers, we create cases in the respect of the purest traditions.
